Summary of Change: Addition of ISR Checklist Item 5.3.5: Has NTIA Spectrum Planning Subcommittee (SPS) Certification of Spectrum Support been obtained for each configuration of all new or modified equipment which will transmit a radio frequency in the NAS?

Reason for Change: Authorization for equipment to transmit (an FTA) in the NAS cannot be obtained from NTIA unless Certification of Spectrum Support has been obtained. Procuring equipment without this certification can be costly if the equipment will not be allowed to transmit in the NAS.

*Please let the ISD Executive Secretariat know if the SME is requested to brief the ASAG/AEB on this addition.

Development, Review, and Concurrence: AJW-1C

Target Audience: All programs

Briefing Planned: Yes.

ASAG Responsibilities: Review and comment. ASAG approved on June 13. AEB approved on June 29.
